Education

2010–2015	**Bachelor**, *College Pitagoras*, Betim - Brazil, *Computer Science*.

Experience

2017–2018	**Junior Developer**, *Ats Informatica*, Nova Lima.

I worked on bug fixes for so-called SLAs and doing refactoring in the ERP system, aimed at the wholesale and retail market, in which the technologies used are: Java, TortoiseSVN, Postgres, MVC, interface framework is JSF. I participated in the communication of the company's ERP system with Magento.

2017–2017	**Junior Developer**, *Data Solution*, Belo Horizonte.

I worked on bug fixes and doing refactoring in the ERP system, aimed at dental operators developed by the company, in which the technologies used are: Java, TortoiseSVN, SQL Server, MVC, interface framework is JSF.

2015–2017	**Trainee Developer**, *Memory*, Belo Horizonte.

I have done refactoring in the public sector ERP system developed by the company in which the C ++ programming language and the IDE C ++ Builder 6 are used, making bug fixes when necessary. I participated in the development of software to manage backups of the company's customer databases, it was developed in the Java language using the Eclipse IDE and the TortoiseSVN, along with the FireBird. Performing the creation and maintenance of an internal knowledge management in the Moodle tool.

Outros	TortoiseSVN, Git, Jenkins, agile methodologies(SCRUM)

About me

I have a lot of determination in my goals and among them are acquiring greater professional knowledge, learning from a team of professionals and being able to pass on that knowledge acquired further when necessary. I would like to work in the software development industry, despite the short period of experience in the development sector, I have a lot of interest in this area and a lot of willingness to learn new things.
