PROJECT WORKS SO FAR

TWITTER SENTIMENT ANALYSIS

DOMAIN: MACHINE LEARNING
Project Duration: March 2019-Ongoing
Platform: Python

- The objective of this task is to detect hate speech in tweets. For the sake of simplicity, we say a tweet contains hate speech if it has a racist or sexist sentiment associated with it. So, the task is to classify racist or sexist tweets from other tweets.
- A training sample of tweets and labels is given, where label '1' denotes the tweet is racist/sexist and label '0' denotes the tweet is not racist/sexist, the objective of this project is to predict the labels on the given test dataset.
