The inevitable bit of maths...

Here is a popular formula:

$$e^{i\pi} = -1 \quad (1)$$

and a somewhat more obscure one:

$$\int_{D_1} \sum_{i=1}^8 \frac{\partial f_1}{\partial x_i} \frac{\partial \varphi}{\partial x_i} \left(1 + |Df_1|^2\right)^{-\frac{1}{2}} dx \leq 0 \quad (2)$$
