TITLE OF THE THESIS

A thesis submitted in partial fulfillment of the requirements for the award of the degree of

B.Tech

in

Electronics and Communication Engineering

By

Person 1 (Roll No. 1)

Person 2 (Roll No. 2)

Person 3 (Roll No. 3)

ELECTRONICS AND COMMUNICATION ENGINEERING
NATIONAL INSTITUTE OF TECHNOLOGY
TIRUCHIRAPPALLI – 620015

MAY 2019

In memory of

Anthony Edward "Tony" Stark

We love you 3000.

BONAFIDE CERTIFICATE

This is to certify that the project titled **TITLE OF THE THESIS** is a bonafide record of the work done by

Person 1 (Roll No. 1)

Person 2 (Roll No. 2)

Person 3 (Roll No. 3)

in partial fulfillment of the requirements for the award of the degree of **Bachelor of Technology** in **Electronics and Communication Engineering** of the **NATIONAL INSTITUTE OF TECHNOLOGY, TIRUCHIRAPPALLI**, during the year 2018-19.

ACKNOWLEDGEMENTS

We would like to express our deepest gratitude to the following people for guiding us through this course and without whom this project and the results achieved from it would not have reached completion.

PROJECT GUIDE, Assistant Professor, Department of Electronics and Communication Engineering, for helping us and guiding us in the course of this project. Without his guidance, we would not have been able to successfully complete this project. His patience and genial attitude is and always will be a source of inspiration to us.

DEPARTMENT HOD, the Head of the Department, Department of Electronics and Communication Engineering, for allowing us to avail the facilities at the department.

We are also thankful to the faculty and staff members of the Department of Electronics and Communication Engineering, our individual parents and our friends for their constant support and help.

APPENDIX A

CODE ATTACHMENTS

A.1 Find the Largest Among Three Numbers

```
# Python program to find the largest number among the three input
    numbers

# change the values of num1, num2 and num3
# for a different result
num1 = 10
num2 = 14
num3 = 12

# uncomment following lines to take three numbers from user
#num1 = float(input("Enter first number: "))
#num2 = float(input("Enter second number: "))
#num3 = float(input("Enter third number: "))

if (num1 >= num2) and (num1 >= num3):
    largest = num1
elif (num2 >= num1) and (num2 >= num3):
    largest = num2
else:
    largest = num3

print("The largest number between",num1,",",num2,"and",num3,"is",
    largest)
```
